A general beneat may be derived from reading as the subject, by learning to avoid what is repulsive in ner, voice, or expression: and by adopting what is appropriate and excellent, without copying particular forms, or being limited to specific regulations. Let each Christan endeavor to attain that fervent spirit of prayer, which will enable him in a strain of holy devotion, with strong fath and cheerful hope, to bring the varying circumstances of himself, his family, the church, and the world, before the throne of grace, in a method which each particular occasion suggests, and in a manner calculated to console his own heart, and enkindle the flame of piety in others." The hints and directions in this volume are calculated to

FOUR DAYS LATER FROM ENGLAND. Reported Great Battle between the Poles and Russians.

The packet ship Samson, Capt. Cobb, which arrived yesterday, from Liverpool, brought us London papers to the 3d of August, and Liverpool to the 4th, both inclusive. A CONTRAST.

By the late John Rudolph Sutermeister. THE MORNING SUN !- the morning sun !-How o'er the earth his lustres move, When his first glance he throws upon The bright, the glowing heaven above ! The birds seek now each verdant spray-Now glide on light and joyous wing, To pour on air their roundelay-To wake on high their carolling !

The soul of halcyon repose Sleeps on the soft and silver air-The zephyr's breath is on the rose, And on the woodbine blossoms fair-The dew reflects the orient sun, Whose magic tints to it are given; Oh! man's fond eye ne'er looked upon A fairer earth-a brighter heaven !

The morning sun !- the morning sun !-Joy wakes to view his glories spread, When night had chased the cloud of dun Whose gloomy folds waved overhead-When nature wakes from soft repose-While sports young May in earth's green bowers-Joy wakes to breathe the fragrant rose-To woodbine's rich and matchless flowers.

To dash with foot-fall light, away From the green sward, the dews of heaven-To list the wild-birds' varied lay, While on the breeze their plumes are given-How blest is Joy's o'erflowing heart To bask beneath the golden dawn-To view the sun his light impart To the bright flowers and dewy lawn !

THE DYING SUN !- the dying sun !-How sink his languid rays to rest-When twilight throws his shroud upon The pale and melancholy west! The rose, which bloomed in early May, Droops now on its deserted stem; O'er its sere leaves and blighted spray, Pours the night-wind, its requiem !

The birds, which sang in summer's light, And danced on bright and purple wing, Wake not the tuncless ear of night-Hushed is their blithesome carolling ! Their rest is where the song hath been-They sleep upon each faded flower-Ah! sorrow's eye can show no scene More welcome than pale twilight's hour !

The dying sun !- the dying sun !-Oh! sorrow loves its failing light-It breathes a kindred glow upon The breast, wrapt in the gloom of night ! I'ale sorrow loves the withered spray-The flower, o'er which the blight hath past-These speak of raptures passed away-Of cherish'd joys, too bright to last !

What though the wild-bird's loved retreat Gives back no more their warbling's dear ! The strain of gladness is not meet For sorrow's lone and tuneless ear ! Better to list the breeze of night O'er each sere leaf and dying flower-Ah! earth can show no sadder sight Than meets the eye at twilight's hour

MODES OF SALUTATION.

The Greenlanders have no outward demonstrations of respect. To them the idea is ridiculous that one man is inferior to another. The natives of the islands adjacent to the Philippines, take the foot or hand of a person and rub it against their faces.

The Laplanders press their noses firmly against those of the persons whom they greet. At New-Guinea, they place leaves upon the head of him they salute.

In the Straits of Sundy they take hold of the left foot of the person saluted; pass it gently over the right leg and then back again. The inhabitants of the Philippine isles bow very low, raise a foot into the air, and bend a

their shoes and stockings. Two black kings of the African coast greet each other by squeezing the middle of the fin-

ger three times. The inhabitants of Carmenia, in proof of a particular attachment, open a vein, and offer a

friend the blood that flows, by way of a drink. When the Chinese meet each other after a long separation, they throw themselves upon their knees, incline their faces two or three times to the earth, and exhibit several other marks of affection. They have also a kind of ritual, or academy of ceremonies, where they regulate the number of reverences, or genuflexmonies four days before preparing for court.

The Otaheitans make their salutations by rubbing their noses one against another. The Dutch, who are notorious eaters, have a morning salute which is common to all ranks-
